GOING FURTHER®

25th September 2026 – 9am

CENTRAL BRANGUS CLASSIC

Welcome to our Annual Sale.
You and your family are invited to the pre-sale inspections from
4pm onwards Thursday 24th September 2026.

119 BULLS & 9 FEMALES

While all care has been taken to ensure that the information in this catalogue is accurate, The Central Brangus Classic Vendors, Nutrien Ag Solutions or City Printing Works take no responsibility for any mistakes & further actions taken by any party resulting from any mistake.

Presale Inspections

We would like to invite you and your family to presale inspections from 4pm onwards Thursday 24th September 2026. Due to an increase in bulls being offered please note sale will be starting earlier. Sale will commence Friday morning at 9am.

Performance Data

All Bulls will be pre-treated for easy movement to clean areas. All Bulls will be weighed, EMA Scanned & a supplementary sheet will be available on Thursday 24th September 2026. Buyers can attend this sale with confidence in the knowledge that all sale lots have been selected, examined and inspected to a high standard.

Agent Rebate

This sale has a rebate of 2% to outside agents introducing buyers in writing twenty four hours prior to sale, attending sale with clients and settling on their behalf within 7 days from date of sale. These conditions will be strictly enforced.

Insurance

We recommend buyers insure their purchases from the sale. Nutrien Insurance Representatives will be at the sale to discuss any insurance matters.

Refreshments

The CQLX Canteen will provide full refreshment facilities.

Online Bidding

Please see our online bidding tab on our website for a direct link to CQLX Bidding Platform 'Stocklive'. Please make sure you read notes at the top of the page in regards to registration prior to sale.

Photography

Once again, this year KB Consulting's Kent Ward who is well known to many, captured this years sale bulls and females. Photos were taken in the middle of July.

This is an unreserved sale.

Brangus Society Registration Status

E-ENROLMENT REGISTER

ELIGIBLE CATTLE:

- Registered Brahman or Angus.
- F1 progeny of Angus or Brahman matings.
- Commercial Brangus – classified by ABCA Inspector.
- Any registered animal having Brahman content (BB) of less than 8% or more than 75%.

F | FOUNDATION REGISTER

- Progeny having one or both parents in the Enrolment Register and with Brahman content between 25% and 75% (with the exception of F1 progeny).

R | REGISTERED BRANGUS

- Progeny of Foundation or Registered Brangus / Foundation or Registered Brangus.
- Must contain no less than 25% and no more than 75% Brahman content.

U | REGISTERED ULTRABLACK OR ULTRARED

- Progeny of Ultrablack or Ultrared / Ultrablack or Ultrared.
- Progeny of Registered Angus (in Enrolment Register)/Enrolment, Foundation or Registered Brangus.
- Must contain no less than 8% and no more than 25% Brahman content.

BB% MEANS BRAHMAN CONTENT PERCENTAGE.

**MORE INFORMATION ON BREEDING BRANGUS

DNA TESTING

INTERPRETING DNA RESULTS

> PARENT VERIFICATION RESULTS

Parent verification is reported back to the member with the following;

Qualified - If qualified is shown next to a Sire or Dam it is indicating the the lab has confirmed that this is the parent

Excluded - If shown next to a Sire or Dam it is indicating the the lab has confirmed that this is not the parent

If you have tested potential parents and the lab results qualify a different parent to the one listed on the database the office will automatically process the pedigree change.

> GENERAL

N - Non-Carrier DNA analysis is consistent with the subject NOT carrying the mutation tested

C - Carrier DNA analysis is consistent with the subject CARRYING the mutation tested

A - Affected DNA analysis is consistent with the subject carrying two copies of the mutation tested

NR - No Result

> COAT COLOUR

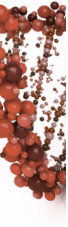

Coat colour testing is reported back to the member with the following

- **ED** Homozygous dominant black
- **ED/e** dominant black/recessive red
- **ED/E+** dominant black/wildtype
- **E+/e** wildtype/recessive red
- **E+/E** Homozygous wildtype
- **e/e** Homozygous recessive red

Several genes are involved in the process of creating the complex coat colours and patterns found in domestic cattle.

One of these is the Melanocortin 1 Receptor (MC1R) gene, also called Extension, that controls the production of black (eumelanin) and red (phaeomelanin) pigments. The three alleles (forms) of this gene are:

- **Dominant black (ED)** - Dominant to the other two alleles and animals with this allele are jet black (solid or spotted).
- **Recessive red (e)** - Two copies of this (e) allele will result in red colour.
- **Wild type (E+)** - the ancestral/'wild-type' allele "E+" is neutral, producing a black coat in the presence of "ED", a red coat in the presence of "e" and a variety of colours in E+/E+ animals, where other genes also influence the pigments produced.

Genotype	Description	Colour
ED/ED	Homozygous Dominant Black	Black
ED/E+	Dominant Black/Wildtype	Black
ED/e	Dominant Black//Recessive Red	Black
E+/e	Wildtype/Recessive Red	Red
E+/E+	Homozygous Wildtype	Varied*
e/e	Homozygous Recessive Red	Red

	E ^D	E ^D
E ^D	BLACK	BLACK
E ^D	BLACK	BLACK

$E^D E^D \times E^D E^D$
100% progeny will be
Black

	E ^D	E ⁺
E ^D	BLACK	BLACK
E ^D	BLACK	BLACK

$E^D E^D \times E^D E^+$
100% progeny will be
black

	E ^D	e
E ^D	BLACK	BLACK
e	BLACK	RED

$E^D e \times E^D e$
75% progeny will be
Black, 25% will be Red.

	E ^D	E ⁺
E ^D	BLACK	BLACK
e	BLACK	RED

$E^D e \times E^D E^+$
75% progeny will be
Black, 25% will be Red.

	E ⁺	e
E ^D	BLACK	BLACK
e	RED	RED

$E^D e \times E^+ e$
50% progeny will be
Black, 50% will be Red

	E ⁺	e
E ⁺	VARIED	RED
e	RED	RED

$E^+ e \times E^+ e$
75% progeny will be RED,
25% will vary depending
upon other factors.

NOTE: Other coat colour genes act as modifiers of these base colours adding white spotting patterns, reorganizing the distribution of red and black pigments (Brindle and Agouti) or diluting the pigments (Dun, Charolais dilution and Simmental dilution). For example, the PMEL17_delTTC allele causes dilution coat colours such as dun, silver dun, yellow, and cream based on an interaction with the MC1R gene. This dilution factor is common in multiple breeds including Charolais, Hereford, Highland, Galloway, and Simmental.

> POLL RESULTS

Poll testing is reported back to the member with the following:

- **PcPc, PcPf and PfPf** Homozygous poll
- **Hpc and Hpf** Heterozygous poll
- **HH** Horned
- **NR** Failed test or due to unresolved haplotype (combination of HornPoll markers fail to produce valid result)

> TENDERNESS

Increase in 'tenderness' is associated with favourable alleles seen within the selected marker panel. In this report, the combined genotype results have been scored between 1 to 10, where 10 is the most favourable number of alleles present.
